

Conditions and Shipment

We prefer blood sent at room temperature (10/20 ml EDTA in unbreakable tubes) (Neonates at least 5 ml) or in case of extracted DNA at least 15ug of DNA in required.

Please mark each tube with the patient's name, date of birth and sex

Ship samples at room temperature. Do not freeze blood samples!

Samples should arrive in our lab within 4 days after withdrawal .

Please send samples with completed request form to the address:

info@genomediagnosticsnijmegen.nl

Clinical data about the patient is not necessary but desirable in order to get more information of the patient.

The price is for a patient. We don't necessarily need the parents' blood sample for patient with Achromatopsia

We can test the parents for analysing a known mutation in the family. Price is usually € 350,- (€ 800,- for prenatal testing).
