Needed: children and young adults with BCM ages 12-30 years for a video game about Blue Cone Monochromacy

Dear BCM families,

At Noroff University College (NUC) two expert computer scientists, Dr. Erik Geslin and Dr. Filipe Pais, are developing a video

game, called "Beyond Blue Mist".

The goal of the project is the production of a video game capable of identifying children with BCM or at least identifying children with similar characteristics.

We are looking for 5 volunteers between 12 and 30 to answer a survey and have an online interview with Erik and Filipe.

Survey and interview will be in English. Boys must sign a consent form and minors must perform these tasks under the supervision of 1 parent or guardian.

If you are not selected now, don't worry, we will keep your name on the list because next year we will need a lot of guys to test the video game.

Please contact me at info@bcmfamilies.org to volunteer.

**Renata Sarno, Ph.D.
